Decisions needed

1. **#IQD-98001 and #IQD-97415:** refund the VAT (credit note + new invoice at 0% reverse charge), yes or no?

2. **#IQD-95400:** who checks the Shopify payment? If 1,900.22 was paid, refund 329.79.

3. **#IQD-97415:** check the −703.41 € credit balance on ProDogs (possible double payment, separate from the VAT).

4. **Accounting (Florian / tax advisor):** for #IQD-97529 and #IQD-96441 the VAT was refunded with a 0% refund line, but the original invoices still contain ES 21% / HU 27% OSS VAT. Please check whether the OSS return needs a correction.

Going forward: new dealers who enter their VAT ID at Shopify checkout are handled automatically by the new automation (tested in staging). Dealers who don't enter it at checkout and aren't in Odoo yet would still be charged VAT, so please ask dealers to always enter their VAT ID.
